More info about the Sample & MIDI Pack:

MELODIC ELEMENTS 04 – ACID BASS MACHINES

FEATURES:

- 100 acid bass loops (124 BPM)
- each loop in wet & dry version
- 100 MIDI files
- 1,33 GB total content

Acid Bass Machines by Resonance Sound is a pristine collection of the finest analog and famous acid synthesizer sounds. A precious selection of analog sequences, expertly processed with top-shelf analog gear – but of course including a dry version, too. Or how about you just fire up your favorite acid synth, throw the MIDI versions at it and make it something completely different?

The loops have been created with the use of high-quality analog synthesizers like the legendary Black Cooperation Kijimi, MFB Dominion, and also the Behringer TD-3. Refined with classic hardware including Roland Space Echo RE-201, Moog MF-108 Cluster Flux, Sherman Filter Bank, Erica Synths Fusion Box, Electron Analog Heat, and a legion of Chase Bliss effect pedals.
