

FILTERGRIZZLY 2

CFA-SOUND FILTERGRIZZLY 2 – FILTER VST VERSION 2.0

Finally, after some years in the dark the all-new FilterGrizzly 2 is available as free filter VST plugin! Rich on character and warmth, the completely overworked filter module is loaded with a tube-based filter drive unit for saturation, followed by an analog modelled 4-pole lowpass and 2-pole highpass filter with a passive controlled feedback circuit!

FEATURES:

- 2x oversampling and anti-aliasing algorithm
- tube-based filter drive unit
- classic analog ladder filter design
- 4-pole lowpass and 2-pole highpass filter
- passive controlled feedback circuit
- new GUI with 2 different skins

PLATFORMS:

- VST 2.3 (32-bit) for Windows
- Note: FilterGrizzly 2 could maybe work via Jbridge in a 64-bit DAW, but we don't guarantee that.

REQUIREMENTS:

- Win32 compatible OS with SSE2-supporting CPU (or higher)

INSTALLATION:

- Extract the downloaded file "CFA-Sound_FilterGrizzly2_VST.zip"
- Copy the contained folder into your VST directory.

THE CONTROLS:

- **INPUT** defines the input volume of the audio signal
- **DRY/WET** defines the amount of the processed signal from completely dry up to full processed
- **OUTPUT** defines the output volume of the wet signal
- **TUBE** defines the intensity of the tube drive modul inside the filter
- **CUTOFF** defines the frequency of the lowpass or highpass filter
- **RESO** defines the resonance amount of the filter and controls also the amount of the passive feedback inside the filter. The higher the value, the more feedback comes into the processed signal.
- **FILTER TYPE** selects the type of filter between 4-pole lowpass and 2-pole highpass
- **PATCH (in the display)** contains the menu for loading or saving a preset. Please make sure of the right written file extension, or example: "your-preset-name.gsd" – if you saving a preset.
- **COLOR (in the display)** selects the GUI skin
- **WWW (in the display)** lets you visit the CFA-Sound website for updates, informations and more.

MIDI CC

- INPUT #61
- DRY/WET #63
- OUTPUT #62
- TUBE #71
- CUTOFF #72
- RESO #73
- FILTER TYPE#74
