

INSTALLATION GUIDE

CFA-SOUND SOLAR Jup-8V

100 Melodic House & Techno Presets

HOW TO IMPORT THE SOUNDBANK:

STEP 1:

Click on the menu icon in the top left corner of the Jup-8V user interface, to access the menu.

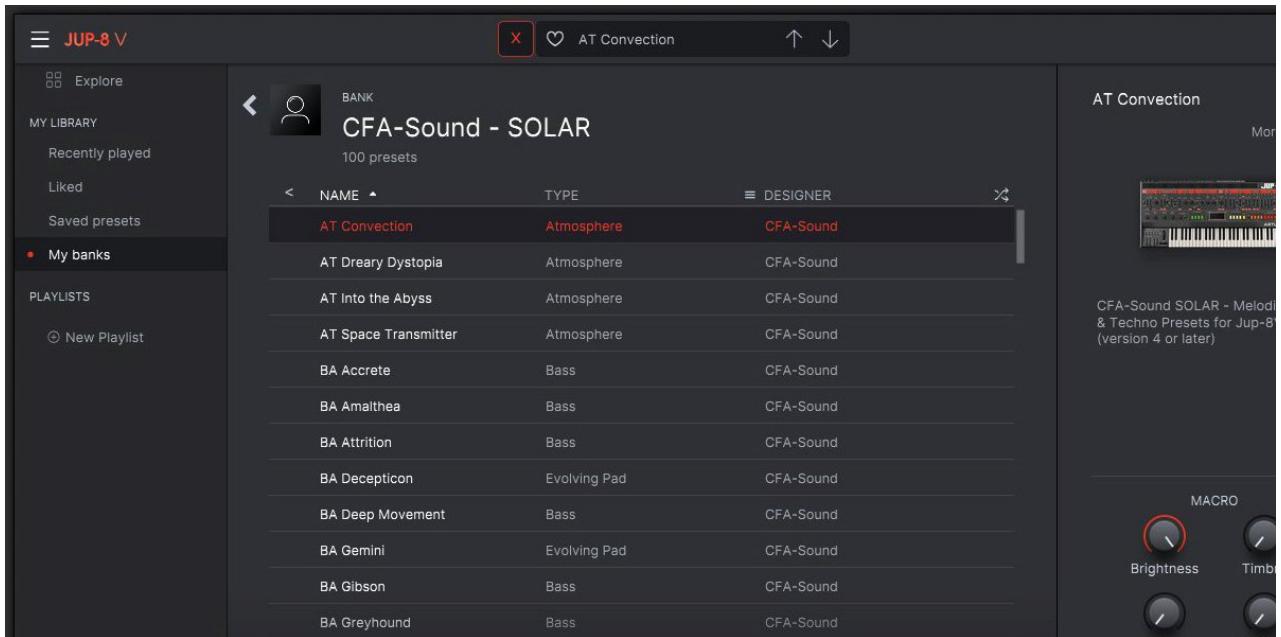

A drop-down menu will be shown - click on "Import..."

And select the "CFA-Sound SOLAR Jup-8V - Melodic House & Techno.jup4x" file from your harddrive.

STEP 2:

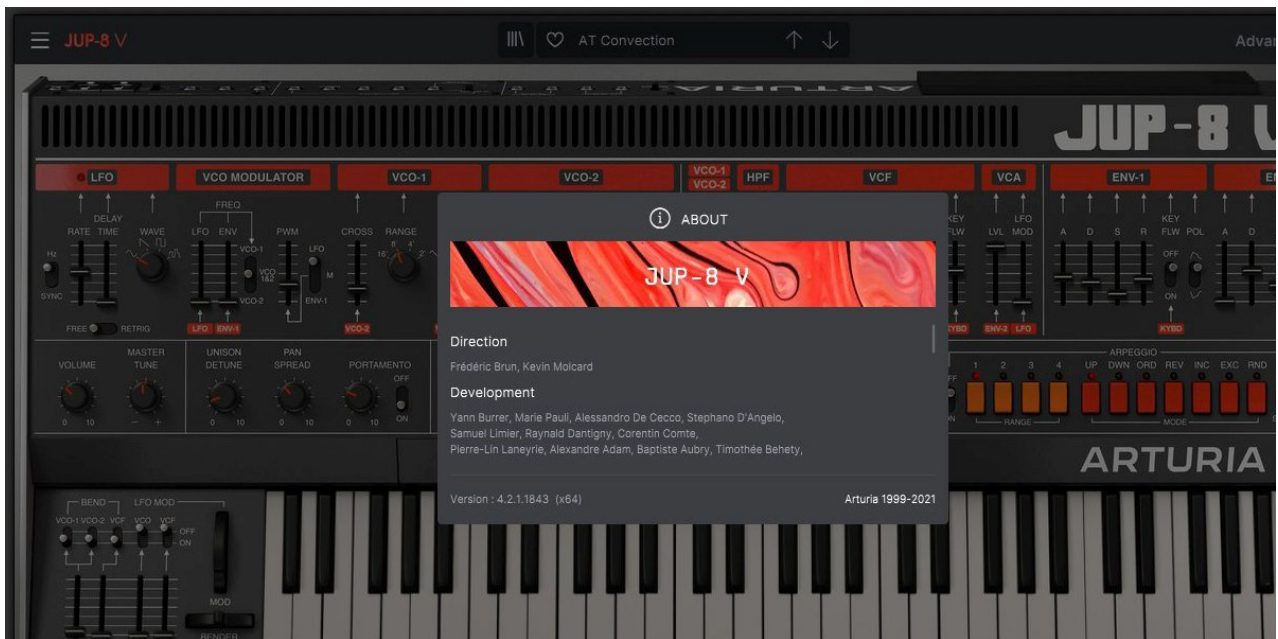

After a short moment, the soundbank is imported and will show up in your Jup-8V preset browser, which you can access via the browser icon in the top middle of the user interface. From there, navigate to "My banks" – and you will find the "CFA-Sound - SOLAR" soundbank listed there.

ADDITIONAL INFO – checking the required version:

To use the soundbank without any compability issues, it`s required to have *Jup-8V* version 4.2.1.1843 or later installed.

You can easily find out, which exact version you have installed, by clicking on the menu icon in the top left of the user interface, and click on the last item of the menu list "About" – a popup screen will appear, which shows the credits and the version number of the installed Jup-8V on your system, like in the example below.

If you have any questions regarding the import of the soundbank or its usage, feel free to contact us directly on our website: www.CFA-Sound.com
